FUTURE CITY

BUILD YOUR OWN CITY!

Problem solving

Conflict Management

Task Assignment & Delegation

In FUTURE CITY teams design a section of a model city. The team work on their own section but ensure they collaborate with other teams for a big picture approach ensuring there is uniformity of design across the zones and that transportation networks flow coherently with the other teams' sections next to theirs and in the city as a whole. Using a wide range of materials, they build a creative city that is functional and aesthetically pleasing. When the time is up, teams join the sections of the city together and celebrate their success in working towards a common goal.

FUTURE CITY

BUILD YOUR OWN CITY!

Teams work to develop a common vision and a shared strategy which they put into place applying creativity and excellent project management skills. Planning and strategy through effective cross team communication and collaboration are essential to ensure the zones of the city interconnect & flow. FUTURE CITY is a fun, memorable, shared experience that relies on engagement, good team dynamics and collaboration across the whole group to ensure success.
