CHERNOBYL

businesss
L&D SOLUTIONS

In springtime, on the night of Saturday 26 April 1986, one of the world's most destructive accidents happened. It shaped the world as we know it and the impact of that devastating incident is still damaging and harming our earth until this very day.
The place where this catastrophe happened is called CHERNOBYL.

CHERNOBYL

businesss L&D SOLUTIONS

We were able to create a time machine that would take us back to April 26, 1986; 2 hours before the global tragedy would occur.
In that night before the wreckage, 5 scientists figured out that the core will explode, and they will try to stop it to save everyone before the unthinkable would take place.
Can you help them stop the reactor? Will the scientists be able to work together to prevent this catastrophe?
